Essential Infrastructure Exemption Sheet

With the start of cyclotron operations for isotope production, TRIUMF is prepared to advance a limited number of essential infrastructure activities.

All such projects and tasks must be approved by an ALD, a Deputy Director, and the Director. They must meet strict criteria, designed to ensure that they are indeed essential and that they can be done following all public health guidance.

Proponents may request permission to proceed by submitting this form to their Associate Laboratory Director for approval; those without an ALD should submit the form directly to their Deputy Director. Completed forms, with approval signatures, should be sent to covid19taskforce@triumf.ca.

The following criteria will be considered in the decision as to whether the project or task can proceed:

- Why is the work essential and of high priority?
- Why does it need to be done now?
- Can it be performed in a manner that preserves physical distance?
- How many people will be required on site at any one time?
- What other groups need to be engaged, and for how long?

All safety protocols must be followed during the planning and execution of the work.
