

# Lorne Udi

Lorne Udy's wife Becky emailed the following information.

Hello, Lorne suddenly passed away early Sunday morning on July 29 at St. Paul's Hospital. I thought he had heat exhaustion Friday, but by the late evening I knew it was more serious. He was taken to our hospital, his heart rate was off the chart and they discovered he had an infection. They are not equipped to do much about cardiac and because he has a metal valve and on blood thinners it became very serious. He was helicoptered to St. Paul's early Sat. morning. They got his heart rate stabled, but were waiting the results of his infection. Our girls and their spouses and me were with him during the day, we all left about 6 p.m. as he was doing well, was able to sit up in a chair and even eat a bit. I went back to our daughters to get some sleep and at 9 p.m. they phoned to say Lorne had a massive stroke because he had a blood infection which went to his valve which caused the stroke. They were unable to stop the bleeding because of being on blood thinners. We had to take him off life support at 4:15 Sunday morning. This is surreal for all of us, he was such a kind, generous and loving man and husband. Please pass along this message. I am just not aware of who else to notify. Appreciate anything that you do. There will be a celebration of life for Lorne probably Oct. 27th (this still to be confirmed) here. I will pass along the exact date when confirmed, my email is [budy2106@telus.net](mailto:budy2106@telus.net). telephone 604-883-2106. Take care, Becky
