To: Users of TRIUMF's Molecular and Materials Science and PIF & NIF

**Programs** 

Subject: CALL FOR PROPOSALS FOR THE TRIUMF MOLECULAR AND

MATERIALS SCIENCE EXPERIMENT EVALUATION COMMITTEE

Below are the steps that spokespersons must follow to receive  $\mu$ SR,  $\beta$ -NMR and PIF & NIF beam time at TRIUMF.

**Step 1:** It is important that you discuss your proposal with a TRIUMF scientist prior to submission. Please contact a CMMS facility scientist (<a href="http://musr.ca/personnel.html">http://musr.ca/personnel.html</a>) regarding μSR and β-NMR proposals and Mike Trinczek (<a href="http://musr.ca/personnel.html">trinczek@triumf.ca</a>) regarding PIF & NIF proposals.

Information about the facilities can be found at the following websites: μSR <a href="http://musr.ca/">http://musr.ca/</a>; β-NMR and β-NQR <a href="http://bnmr.triumf.ca/">http://bnmr.triumf.ca/</a>; PIF & NIF <a href="https://www.triumf.ca/pif-nif">https://www.triumf.ca/pif-nif</a>.

**Step 2:** Contact <a href="mailto:sciencediv@triumf.ca">sciencediv@triumf.ca</a> to request an experiment number and access to the TRIUMF Science Applications website: <a href="https://mis.triumf.ca/science/dashboard.jsf">https://mis.triumf.ca/science/dashboard.jsf</a>. Please provide a title for the experiment and the facility you wish to use.

## New experiment numbers must be requested by 16:30 (PST) Friday, December 1st, 2023.

**Step 3:** Prepare your proposal using the templates found here.

- Progress reports are needed for a new experiment or an approved experiment that has not been evaluated since the January 2022 MMS-EEC meeting.
- Progress reports will only be considered if they are directly related to the original proposal. If the proposed research is significantly different from the original proposal, a new experiment number will be needed.
- Proposals can be submitted for deferred experiments. Please respond to the comments raised by the MMS-EEC from the previous submission.
- A single proposal can be used to request beam time for μSR experiments on different instruments or with different sample environments. A single proposal can also be used to request beam time for experiments on β-NMR and β-NQR. However, Spokespersons must submit separate proposals for μSR and β-NMR experiments, even if they concern the same material. Spokespersons may submit a single proposal to request beam time on different PIF & NIF beamlines.

**Step 4:** Log on to the <u>TRIUMF Science Applications website</u>, click on the tab for your experiment number to edit, and submit your proposal.

The **DEADLINE** for receipt of new proposals and progress reports for  $\mu$ SR,  $\beta$ -NMR and PIF & NIF experiments is firm at:

## Wednesday, December 6th, 2023 at 23:59 PST

The next evaluation of proposals by the MMS-EEC will take place on:

## Monday, January 15th and Tuesday, January 16th, 2024

**Step 5:** The number of allocated shifts will be viewable on the <u>TRIUMF Science Applications website</u> immediately upon the conclusion of the MMS-EEC meeting. The comments of the MMS-EEC will be distributed to spokespersons two weeks after the end of the meeting.

**Step 6:** You must submit a separate request to use your banked shifts in a particular beam period. The deadline to request to use banked shifts in Schedule 146 (May – September 2024) is firm at:

## Wednesday, January 31st, 2024 at 23:59 PST

You will receive a reminder about the beam request deadline in late January 2024. The beam request is submitted through the <u>TRIUMF Science Applications website</u>.

Members of the MMS-EEC are:

Chairperson: Takashi Imai – McMaster University (Hamilton, ON, Canada)

**Secretary**: lain McKenzie – TRIUMF and Simon Fraser University (Vancouver, BC, Canada)

**Members:** Andrea Bianchi – University of Montreal (Montreal, QC, Canada)

David Bryce – University of Ottawa (Ottawa, ON, Canada) Jeffrey Rau – University of Windsor (Windsor, ON, Canada)

Jeff Quilliam – University of Sherbrooke (Sherbrooke, QC, Canada)

Information about the MMS-EEC can be found here and the Terms of Reference can be found here.
