

Special TARA event

Solar panels installation experience:

Primary speaker: Andrew Daviel

Date: [Wednesday, April 5th 2023](#)

Location: TRIUMF auditorium and possibly Zoom call

Time 13:30- 15:30

We are pleased to invite you to participate in a Special TARA Event discussing “personal !!” experience in outfitting solar panels to a house. Andrew Daviel has made such an installation at his home on Mayne Island (he also had a previous go at it at his former Richmond home some years back). Although there are lots of relevant information available on the Web regarding solar panels installations- [some extensive ones by Andrew himself-], there is nothing more valuable than to hear from someone who has gone through the exercise single handedly. Often one even learns more from the mistakes than from the successes.

Andrew will lead the event with a 30 min presentation and will be available to answer questions regarding his experience. We will open the floor to others who may want to contribute their relevant wisdom on the solar panel installation subject.

This is the first announcement of this event and we would like to know who will attend in person, who will want to have a zoom access and if you want to have a slot in the agenda for your own presentation. Please reply to dana@triumf.ca and jmp@triumf.ca

To help focus the presentation, we would also like to hear of specific topics that you would be most interested in having Andrew address in his talk. A formal agenda will be circulated in the next announcement mid March.

We hope many of the TARA members will join this event and we are looking forward to seeing you on a sunny ? April 5th 2023.

For the TARA 2023 executive,

Jean-Michel Poutissou
